

# Core Java Placement Handbook - Part 1

## (Questions 1-25)

Q1. Which of the following is a valid Java identifier?

- A. 1student
- B. student\_name
- C. class
- D. @student

Answer: B

Explanation: Identifiers cannot start with a digit or contain @; 'class' is a keyword.

Q2. Java is a \_\_\_\_\_ language.

- A. Procedural
- B. Object-Oriented
- C. Functional
- D. Assembly

Answer: B

Explanation: Java is primarily an object-oriented programming language.

Q3. Which keyword is used to create an object?

- A. class
- B. object
- C. new
- D. create

Answer: C

Explanation: The new keyword allocates memory for an object.

Q4. Which method is the entry point of a Java program?

- A. start()
- B. run()
- C. main()
- D. execute()

Answer: C

Explanation: Execution starts from main().

Q5. Which data type stores whole numbers?

- A. float
- B. int
- C. double
- D. char

Answer: B

Explanation: int stores integer values.

Q6. Size of int is

- A. 2 bytes
- B. 4 bytes
- C. 8 bytes
- D. Depends on OS

Answer: B

Explanation: Java int is 32 bits.

**Q7. Which operator is used for comparison?**

- A. =
- B. ==
- C. :=
- D. equals

Answer: B

Explanation: == compares primitive values.

**Q8. Which loop executes at least once?**

- A. for
- B. while
- C. do-while
- D. foreach

Answer: C

Explanation: Condition is checked after first iteration.

**Q9. Which keyword exits a loop?**

- A. continue
- B. stop
- C. break
- D. exit

Answer: C

Explanation: break terminates the loop.

**Q10. Which keyword skips the current iteration?**

- A. break
- B. continue
- C. pass
- D. next

Answer: B

Explanation: continue jumps to the next iteration.

**Q11. Which is not an OOP concept?**

- A. Inheritance
- B. Encapsulation
- C. Compilation
- D. Polymorphism

Answer: C

Explanation: Compilation is not an OOP concept.

**Q12. A class is a \_\_\_\_\_.**

- A. Real Object
- B. Blueprint
- C. Variable
- D. Function

Answer: B

Explanation: A class defines objects.

**Q13. An object is**

- A. Blueprint
- B. Instance of a class
- C. Variable
- D. Method

Answer: B

Explanation: Objects are created from classes.

**Q14. Which keyword is used for inheritance?**

- A. implements
- B. extends
- C. inherit
- D. using

Answer: B

Explanation: extends inherits a class.

**Q15. Java supports**

- A. Multiple class inheritance
- B. Single class inheritance
- C. No inheritance
- D. Hybrid inheritance

Answer: B

Explanation: Java classes support single inheritance.

**Q16. Which concept allows one method to have multiple forms?**

- A. Encapsulation
- B. Polymorphism
- C. Inheritance
- D. Abstraction

Answer: B

Explanation: Polymorphism means many forms.

**Q17. Method Overloading is**

- A. Runtime
- B. Compile-time
- C. Inheritance

D. Abstraction

Answer: B

Explanation: Resolved at compile time.

### Q18. Method Overriding is

A. Compile-time

B. Runtime

C. Static

D. Final

Answer: B

Explanation: Resolved at runtime.

### Q19. Which keyword refers to the current object?

A. self

B. current

C. this

D. super

Answer: C

Explanation: this refers to current object.

### Q20. Which keyword refers to the parent class?

A. parent

B. this

C. extends

D. super

Answer: D

Explanation: super refers to parent members.

### Q21. Which keyword prevents inheritance?

A. private

B. static

C. final

D. abstract

Answer: C

Explanation: final class cannot be inherited.

### Q22. Which keyword belongs to a class rather than an object?

A. final

B. static

C. this

D. super

Answer: B

Explanation: static members belong to the class.

**Q23. Which block is always executed in exception handling?**

- A. catch
- B. try
- C. finally
- D. throw

Answer: C

Explanation: finally executes whether exception occurs or not.

**Q24. Which collection allows duplicate elements?**

- A. HashSet
- B. TreeSet
- C. ArrayList
- D. HashMap

Answer: C

Explanation: ArrayList permits duplicates.

**Q25. Which method starts a new thread?**

- A. run()
- B. execute()
- C. start()
- D. begin()

Answer: C

Explanation: start() creates a new thread and invokes run().
